PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive web applications using React.js, JavaScript, TypeScript, HTML5, CSS3, and RESTful APIs. Experienced in component-based architecture, React Hooks, UI development, API integration, and frontend optimization. Passionate about building scalable, high-performance, and user-friendly applications.

SKILLS

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, React Hooks, Tailwind CSS, Bootstrap, React Router

Tools & Platforms: Git (Version Control), GitHub, Postman, RESTful APIs, WordPress

Core Competencies: UI Development, Responsive Web Design, Component Architecture, Component Reusability, React Hooks, API Integration, API Testing, Cross-browser Compatibility, Frontend Optimization, Dependency Troubleshooting

WORK EXPERIENCE

Frontend Developer June 2024 – Present

Blue Silicon Infotech Private Limited, Chennai

- Refactored duplicated tab-rendering logic (renderPendingTab, renderPublishedTab) into a shared renderAssessmentPanel component driven by a reusable useAssessmentFilters hook, reducing code duplication across the MEDSY admin platform.
- Resolved an npm peer dependency conflict (draft-js-export-html vs. immutable version mismatch) that was blocking builds, restoring a working development environment.
- Redesigned assessment navigation by replacing a metric card grid with a horizontal tab-pill strip and adding breadcrumb navigation, improving usability across Skills, Assessment, and Question Bank pages.
- Developed reusable React components for the JobsLink platform, improving UI consistency and reducing development effort for new features.
- Integrated REST APIs to fetch and display real-time data across multiple modules, improving data accuracy and user experience.
- Implemented AI-generated content into functional, patient-facing web interfaces for the MEDSY medical AI platform.
- Ensured cross-browser and cross-device compatibility; debugged and resolved frontend issues to boost performance.
- Collaborated with team members on feature development, code reviews, and UI/UX enhancements.

PROJECTS

JobsLink — Job Portal Web App 2024

Technologies: React.js, JavaScript, REST API, Bootstrap, Git

- Designed and developed a responsive job portal with dynamic listings, filters, and real-time REST API integration.
- Created reusable UI components to improve maintainability and speed up feature development.

MEDSY — AI Medical Platform 2025

Technologies: React.js, REST API, AI Content Integration, CSS3

- Built a reusable useAssessmentFilters hook to unify pending/published assessment views into a single renderAssessmentPanel component.
- Restructured assessment navigation with breadcrumbs and a tab-pill strip, replacing a static metric card grid.
- Built responsive UI consuming AI-generated content and API data for patient-facing interfaces.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Selvam College of Technology, Namakkal | May 2024
